Within the business and industrial zoning districts and subject to all requirements and conditions of this Ordinance, land and buildings may only be used for uses listed in the Table of Permitted Uses for Business and Industrial Districts. Uses permitted by right in the various districts are indicated by an X and uses permitted on appeal are indicated by an A in the appropriated columns of the Table of Permitted Uses, which follows herein.

For Non-residential Districts

Following are the intended characteristics for each of the business and industrial districts:

- 61.1 B-1 NEIGHBORHOOD TRADE DISTRICTS. This district is intended primarily to serve the needs of the surrounding residential neighborhood, providing goods and services that are day-to-day needs, generally classed by merchants as "convenience goods and services". Businesses, which might tend to be a nuisance to the immediately surrounding residential developments, are excluded, even though the goods or services offered might be in the convenience category or classification.
- 61.2 B-2 GENERAL BUSINESS DISTRICTS. This district serves several functions. It provides for the orderly development and expansion of the central business district, encouraging the discontinuance of non-conforming uses and a minimum of traffic and parking congestion. This district also provides comparison shopper's goods, convenience goods and services, specialty goods, amusements, and services for less than a Town-wide market. The primary purpose of these functions is retail trade. In addition, the district provides locations for small businessmen with a Town-wide market who cannot operate in the downtown area.
- 61.3 M-1 LIGHT MANUFACTURING DISTRICT. This district is intended for industrial uses, which are not offensive to nearby commercial or residential uses, and for business uses, which generally support and are integrated with these industrial uses. Further development of residences is prohibited from these districts to prevent residences from being established under strongly adverse conditions and to conserve the supply of industrial land.

61.4 HEAVY MANUFACTURING DISTRICT. This district is for heavy industrial activities, which may be offensive, or incompatible, if located near commercial or residential uses, and for limited business uses which support or are compatible with, these heavy industrial activities. Further development of residences is prohibited from these districts to prevent residences from being established under strongly adverse conditions and to conserve the supply of industrial land.

No buffer shall, however, extend nearer to a street right-of-way line than the established building line of the adjoining residential lot.

C. For B-1, or B-2 Districts, structures on a corner lot must set back a minimum of forty (40) feet from any side street right-of-way if parking is to be permitted between the principal building and the side street. In such cases the front yard on such lot may be less than the required front yard but not less than the average of the existing front yards on the developed lots; provided, however, the front yard on such lot shall not be less than one-half the required front yard. For the purpose of computing such average, an adjacent vacant lot shall be considered as having the minimum required front yard specified for that zoning district.
